Stephanie Foster, Product Manager of Payments, Fiserv

Stephanie Foster is currently the Product Manager of Payments at Fiserv. She has been a Wnet member since 2018 where she learned about Wnet through a friendly invite to a local Wnet event in Atlanta. Stephanie joined Wnet because she has worked in the payments industry for almost two decades and has always felt that she was the only woman in the room. She is very excited to join this community of women who she can relate to on a professional level. She is currently involved in Wnet through the Rise Up and Atlanta Chapters. What Stephanie finds the greatest benefit of her involvement so far has been is the opportunity to network and make new connections with industry women.

Her greatest fun, "ah ha", or victory moment as a Wnet member has been participating in the Money 20/20 Rise Up Academy in Vegas in 2018! Stephanie's advice she would give to other Wnet members is to take full advantage of all the resources the organization has to offer. Advice Stephanie would give to any woman in payments who is not yet a Wnet member is that Wnet is one of the best investments you can make in your career to support your own professional development. The networking, learning, access to female industry leaders, and volunteer opportunities are priceless."
